Camera Orientation								2	2	2	3
Analyze and select suitable techniques for camera orientation to fulfill project goals. This includes: Placement, FOV techniques; movements; match-moving, etc.											
Animation Techniques			2	2	2			3	3		3
Adopts habits and techniques to support industry standards for animation. This includes: Keyframing & manipulation; curve editor & types, paths, non-linear, facial, to sound, expressions/scripts, timeline controls; deformers, blend shapes, frame rate, inanimate objects, layers, characters, body mechanics in relation to characters, etc.											
Motion Capture					2			3			
Adopts industry-recognized habits and techniques to support data acquired through motion capture. These techniques can be applied to real-world unpredictable situations and include: Capturing data, using data, cleaning data, re-targeting data, etc.											
Animation Fundamentals			2	2	3			4	4		4

//3D Animation & Visual Effects

Uses digital media environments to communicate and work collaboratively to support individual learning and contribute to others.

<p data-bbox="115 597 747 950">Adopts habits to support industry-standard graphic design requirements and solve challenges. These standards can be applied to real-world unpredictable situations and include: Illustrations, 2D Animations, texturing, filters, adjustments, selections, masking, format and delivery output, and preparation and/or finishing of graphics for modeling, animation, and special effects.</p>	

 <p data-bbox="86 349 747 479">//3D Animation & Visual Effects</p>	<p data-bbox="747 191 917 553">Advanced Motion Graphics & Digital Compositing</p>
<p data-bbox="86 553 747 594">Production Standards--Modeling</p>	
<p data-bbox="86 594 747 873">Adopts habits to support industry-standard modeling requirements and solve 3D Modeling challenges. These standards can be applied to real-world unpredictable situations and include: Model requirements, complexity, media format and delivery output, and preparation of geometry for sculpting.</p>	
<p data-bbox="86 873 747 914">Modeling Techniques</p>	
<p data-bbox="86 914 747 1227">Adopts modeling techniques to support industry-standards and solve 3D Modeling challenges. These techniques can be applied to real-world unpredictable situations and include: Create polygon models, subdivision surface models, NURBS models, conversion to/from polygon, subdivision, and NURBS; normals, topology, modifiers</p>	
<p data-bbox="86 1227 747 1268">Modifiers</p>	
<p data-bbox="86 1268 747 1385">Utilizes appropriate modifiers to achieve project goals. This includes: Deformation, Animation, etc.</p>	

 <p>//3D Animation & Visual Effects</p>	Advanced Motion Graphics & Digital Compositing
Surface Texture Techniques	
<p>Applies surface material and techniques to models. This includes: texturing, UVs--layout, unwrapping, manipulating; create/assign textures to polygons; materials, mental ray</p>	
Scene Composition	4
<p>Combines resources and techniques to support scenes. This includes: Layout, dressing, lighting, camera angles and techniques, rendering a turntable view, etc.</p>	

 <p data-bbox="86 349 747 479">//3D Animation & Visual Effects</p>	<p data-bbox="835 203 917 548">Advanced Motion Graphics & Digital Compositing</p>
<p data-bbox="86 560 220 587">Sculpting</p>	
<p data-bbox="115 597 703 987">Adopts habits and techniques to support industry standards for sculpting. These techniques can be applied to real-world unpredictable situations and include: Symmetry, asymmetry, additive/subtractive sculpting/ creating/using alphas, adding new geometry; brushes; move/reposition mesh; polygon management based on hardware, scene mgmt of multiple pieces of geometry, topology flow and manipulation, exporting</p>	
<p data-bbox="86 998 241 1026">Evaluation</p>	4
<p data-bbox="115 1036 640 1107">Critiques/analyzes completed project to determine if it accomplishes objective.</p>	
<p data-bbox="86 1120 199 1148">Rigging</p>	
<p data-bbox="115 1157 735 1421">Adopts habits and techniques to support industry standards for rigging. These techniques can be applied to real-world unpredictable situations and include: Set-Driven Keys, relationships; constraints; bones/joints; binding; Character, facial, inanimate objects, deformers, expressions, scripting, caching, etc.</p>	

 <p>//3D Animation & Visual Effects</p>	Advanced Motion Graphics & Digital Compositing
Camera Orientation	4
<p>Analyze and select suitable techniques for camera orientation to fulfill project goals. This includes: Placement, FOV techniques; movements; match-moving, etc.</p>	
Animation Techniques	4
<p>Adopts habits and techniques to support industry standards for animation. This includes: Keyframing & manipulation; curve editor & types, paths, non-linear, facial, to sound, expressions/scripts, timeline controls; deformers, blend shapes, frame rate, inanimate objects, layers, characters, body mechanics in relation to characters, etc.</p>	
Motion Capture	4
<p>Adopts industry-recognized habits and techniques to support data acquired through motion capture. These techniques can be applied to real-world unpredictable situations and include: Capturing data, using data, cleaning data, re-targeting data, etc.</p>	
Animation Fundamentals	4

 <p data-bbox="86 349 747 479">//3D Animation & Visual Effects</p>	<p data-bbox="835 203 917 548">Advanced Motion Graphics & Digital Compositing</p>
<p data-bbox="121 560 730 630">Evaluates and utilizes industry standards for animation. This includes: Principles, cycles, etc.</p>	
<p data-bbox="86 641 394 669">Dynamics & Special FX</p>	
<p data-bbox="121 678 743 863">Employs industry-recognized techniques for incorporating dynamics and special effects into projects. These techniques can be applied to real-world unpredictable situations and include: Particles, Rigid bodies, soft bodies, etc.</p>	

 <p>//3D Animation & Visual Effects</p>	Advanced Motion Graphics & Digital Compositing
Sound	4
<p>Adopts habits and techniques for blending audio with animations. This includes: Formats, syncing, etc.</p>	
Production Standards--Motion Graphics	4
<p>Adopts habits to support industry-standards for motion graphics. This includes: Requirements, complexity, media & file formats and delivery output, interlacing, progressive scans, motion graphics--action/title safe, colors, etc.</p>	
Motion Design Techniques	4
<p>Adopts motion design techniques to support industry-standards. These techniques can be applied to real-world unpredictable situations and include: Color, typography, layout & animate according to storyboard, layering to achieve depth, blend modes, alpha channels, masks, principles of animation, channels & apps, Z depth, masks & mattes, motion blur, compositing, etc.</p>	

 <p data-bbox="86 349 747 479">//3D Animation & Visual Effects</p>	<p data-bbox="835 203 917 548">Advanced Motion Graphics & Digital Compositing</p>
Effects	4
<p data-bbox="121 597 716 747">Utilizes appropriate techniques and effects to support projects according to industry standards. This includes: Color correction, modification effects, keying, etc.</p>	
Rendering	4
<p data-bbox="121 795 716 906">Evaluates and selects appropriate rendering techniques to support projects. This includes: Settings, formats, etc.</p>	
Advanced employability skills	4
<p data-bbox="121 954 716 1219">Demonstrates Advanced Employability Skills necessary for successful entry into a career or college. This includes: Independent Judgment/Creativity and Innovation/Troubleshooting/Decision making/participation in forums/lifelong learner, etc.</p>	
Finishing	4
<p data-bbox="121 1268 716 1378">Evaluates and selects appropriate finishing techniques to support projects. This includes: Lighting, texturing, shadows, transparency, etc.</p>	
Collaboration/Teamwork	3
